ParaTech Solutions
AI & DIGITAL SOLUTIONS

COMPANY PROFILE & STATEMENT OF SERVICES

Website Development Services Acknowledgement

Date: [DATE]

To Whom It May Concern,

This document describes ParaTech Solutions ("**ParaTech**", "**we**") and the services we provide, and acknowledges that we offer website design and development services to our clients.

1. About ParaTech Solutions

ParaTech Solutions is a digital growth, technology and AI automation partner based in **Lahore, Pakistan**. We design digital experiences, build software, drive growth and automate business operations with AI. Businesses use us as one partner for their website, software, marketing and AI workflows, rather than coordinating several separate vendors.

2. Our Services

We deliver four connected capabilities:

- **AI & Automation** – lead response and qualification, WhatsApp and SMS automation, appointment and follow-up automation, document and data processing, CRM and pipeline automation, customer support automation, and custom AI agents.
- **Web & Software** – websites, web design and UI/UX, landing pages, e-commerce platforms, custom dashboards and portals, and business systems and web applications.
- **Growth & Marketing** – SEO, local SEO, Google Maps optimisation, Google Ads and PPC, and social media marketing.
- **Data & Analytics** – business dashboards, automated reporting, KPI and performance tracking, and attribution and analytics.

3. Website Development Services

Our website development work covers the full life of a project:

- **Web development** – fast, reliable, accessible websites built for real-world performance.
- **Web design and UI/UX** – interfaces designed around how customers actually behave.
- **Landing pages and conversion design** – focused pages built for specific campaigns and offers.
- **E-commerce platforms** – storefronts with real catalogues, payment flows and fulfilment.
- **Dashboards, portals and web apps** – client portals, internal dashboards and custom business software.
- **Integrations and maintenance** – CRM, payments, messaging and analytics integrations, plus post-launch support and improvement.

We work with modern technologies including Next.js, TypeScript, Python and PostgreSQL, and integrate with tools such as HubSpot, Zoho, Shopify, WhatsApp, Google Ads and Google Analytics.

How we work. Every project follows five steps: **Understand** (audit of goals, users and workflows), **Design** (user journeys and interfaces), **Engineer** (development, automation and integrations), **Launch** (testing, performance tuning and deployment) and **Improve** (analytics-driven optimisation).

4. Acknowledgement

ParaTech Solutions confirms and acknowledges that:

a. it provides the services described in this document, including website design and development, to its clients;

b. it operates as an independent business and service provider, and delivers its services under written agreements or statements of work with its clients;

c. the information in this document is accurate and reflects the services listed on www.paratechsolutions.com; and

d. this document is issued for verification and onboarding purposes, including account registration with service and payment platforms, and may be relied on as a description of its business.
